

FoodService Ace™

Ready when you are.

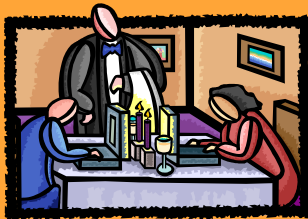

FoodService Ace™

Integrated software designed specifically for Multi-Unit Restaurant/Foodservice/Catering operations. With back-office accounting support functions, inventory and centralized purchasing, sales analysis, event management plus integration to our comprehensive commissary (inventory and production), delivery, and corporate accounting modules—we have you covered! Add an array of reporting options including operational reports, specialized activity and analysis reports plus management dashboards—you will easily and effectively be informed.

Good information enables good decisions!

What is **FoodService Ace™**?

A full set of integrated components designed to support foodservice operations that can be deployed as required to address a focused need or encompass the entire enterprise.

- * Back Office—Unit-level Cash Management, Payables, Inventory, Inter-Unit Transfers, Central Purchasing and Financial reporting. Integrates with Corporate Accounting or existing accounting application.
- * Commissary Operations—Full function Order Entry with web-deployment, Purchasing, Production/Kitchen Management with costing and Nutritional Information, Inventory Control, Storeroom Operations and Routing/Delivery Management.
- * Corporate Accounting—Cash Management and Sales Reporting, Accts Receivable, Accts Payable, General Ledger and Fixed Assets.
- * Reports—draw from a library of over 200 reports for activity and analysis. Use management dashboards for quick glances and ad-hoc queries.
- * E-Commerce—available API's support web storefronts, integration with other support systems and built-in EDI.
